

**Cools when hot.
Warms when cold.
Ideal comfort for the best night's sleep!**

KulKote Ceramic is more than just a cooling layer – it's a high-performance thermal conductor engineered to enhance comfort. Infused with advanced ceramic technology, it creates a super-conductive pathway that rapidly disperses heat away from the body. Rather than just feeling cool to the touch, KulKote Ceramic actively works to eliminate heat buildup within your mattress or pillow.
